

Nathanim Tadele

Software Developer

Experienced software developer with a strong proficiency in both MERN stack (MongoDB, Express.js, React, Node.js) and Python development. Adept at designing and implementing robust and scalable solutions, I bring a wealth of knowledge in full-stack development. Passionate about creating efficient and innovative software, my expertise lies in translating complex technical requirements into practical and user-friendly applications. Proven ability to collaborate in cross-functional teams.
